I should stay home from school

As a class discuss reasons one should stay home from school (sick with a fever) and reasons you shouldn’t stay home from school (you don’t have any clean clothes or have a bad haircut). Have students create posters telling other students bad reasons to stay home. Students can create these posters on the computer, can create them with paper and crayons/markers, or can cut pictures from magazines and make a college.

Example poster:

Bad haircut?

That’s not a good reason to not go to school. You should go to school every day except if you see a doctor and they tell you that you should stay home from school.
