Intervention Access at Home/Outside of School

Academic interventions are available to identified students outside of the school day through Clever.

Students can access Clever through the Student Toolbox on the MPS home page, or directly at http://clever.com/in/milwaukee.

From the MPS home page, students should hover over Students on the toolbar and select Student Toolbox.

Students should then click Log in with Google.

Students first will be asked for their email address. Students should enter their full email address, which is their S# followed by @milwaukee.k12.wi.us; for example, s735329@milwaukee.k12.wi.us.

Students then will be asked to enter their password. Students should enter their date of birth in the format of dd/mm/yy; for example, 03/10/05.

Students now will be on their personal Clever home page. The interventions they have access to will be listed on this page. All academic Tier 2 interventions are located in the Intervention section. If you look at the far left list, you will see Intervention listed. If an intervention is not listed, the student does not have access to this intervention. Students can click on any of the interventions to access the intervention and will not be required to enter another password.
